29 Reasons to Love PowerPoint", "Full Microsoft Office Mobile now available on select Nokia Symbian phones". The previous version had been written for the PowerPoint 97 release ... Archived from the original on May 29, 2015. Microsoft Corporation (October 25, 2011). Vol. 14, no. 2. "Standard ECMA-376: Office Open XML File Formats". PCWorld. "Microsoft PowerPoint 3.0 for Macintosh". PowerPoint for the web also lacks the Outline, Master, Slides Sorter, and Presenter Views present in the desktop app, as well as having limited printing options.[93] Cultural impact A PowerPoint presentation in progress. Business uses PowerPoint was originally designed for business presentations. "...[132] There were also others who disagreed with Tufte's assertion that the PowerPoint program reduces the quality of presenters' thoughts". Steven Pinker, professor of psychology at MIT and later Harvard, had earlier argued that "If anything, PowerPoint, if used well, would ideally reflect the way we think"[133] Pinker later reinforced this opinion: "Any general opposition to PowerPoint is just dumb. ... Vol. 14, no. 34. Our focus was purely on business users, in small and large companies, from one person to the largest multimultinationals.[94]76–77 Business people had for a long time made presentations for sales calls and for internal company communications, and PowerPoint produced the same formats in the same style and for the same purposes.[94]420 PowerPoint use in business grew over its first five years (1987-1992) to sales of about 1 million copies annually, for worldwide market share of 63 percent.[64]Over the following five years (1992-1997) PowerPoint sales accelerated, to a rate of about 4 million copies annually, for worldwide market share of 85 percent.[95]The increase in business use has been attributed to "network effects," whereby additional users of PowerPoint in a company or an industry increased its salience and value to other users.[96] Not everyone immediately approved of the greater use of PowerPoint for presentations, even in business. OpenXML was designed from the start to be capable of faithfully representing the pre-existing corpus of word-processing documents, presentations, and spreadsheets that are encoded in binary formats defined by Microsoft Corporation. "Microsoft rejection letter, 1987". Alt URL. ^ Watt, Peggy (January 27, 1986). doi:10.1109/MSPCE.1998.646010. Frontiers in Psychology. In addition to a computer slide show projected to a live audience by a speaker, PowerPoint can be used to deliver a presentation in a number of other ways: Displayed on the screen of the presentation computer or tablet (for a very small group)[64] Printed for distribution as paper documents in several formats.[85] Distributed as files for private viewing, even on computers without PowerPoint[86] Packaged for distribution on CD or a network, including linked and embedded data.[87] Transmitted as a live broadcast presentation over the web.[88] Embedded in a web page or blog.[89] Shared on social networks such as Facebook and Twitter[90] Set up for self-running unattended display[91] Recorded as video/audio (H.264/AAC), to be distributed as for any other video[92] Some of these ways of using PowerPoint have been highlighted by JoAnne Yates and Wanda Orlikowski of the MIT Sloan School of Management.[79] The standard form of such presentations involves a single person standing before a group of people, talking and using the PowerPoint slideshow to project visual aids onto a screen. "Free market economics—not intervention—drives innovation". pp. 40–41. "PowerPoint Historical Review". ^ a b Microsoft Corporation (2015). ^ Guernsey, Lisa (May 31, 2001). ^ a b Paul, Ian (February 20, 2014). IDC, p. B1. I said, "Bill, I think we really ought to do this"; and Bill said, "No, no, no, no, that's just a feature of Microsoft Word, just put it into Word. ...". Bill Gates introduces Microsoft Office 2003 in New York Tuesday, Oct. Archived from the original (PDF) on November 12, 2014. pp. 95–98. New development techniques (shared across Office) for PowerPoint 2016 have made it possible to ship versions of PowerPoint 2016 for Windows, Mac, iOS, Android, and web access nearly simultaneously,[citation needed] and to release new features on an almost monthly schedule.[61] PowerPoint development is still carried out in Silicon Valley as of [2017update].[62] In 2010, Jeff Raikes, who had most recently been President of the Business Division of Microsoft (including responsibility for Office),[63] observed: "of course, today we know that PowerPoint is oftentimes the number two—or in some cases even the number one—most-used tool" among the applications in Office.[137] Sales and market share PowerPoint's initial sales were about 40,000 copies sold in 1987 (nine months), about 85,000 copies in 1988, and about 100,000 copies in 1989, all for Macintosh.[64] PowerPoint's market share in its first three years was a tiny part of the total presentation market, which was very heavily dominated by MS-DOS applications on PCs.[65] The market leaders for MS-DOS in 1988-1989[66] were Harvard Graphics (introduced by Software Publishing in 1986[67]) in first place, and Lotus Freelance Plus (also introduced in 1986[68]) as a strong second.[69] They were competing with more than a dozen other MS-DOS presentation products.[70] and Microsoft did not develop a PowerPoint version for MS-DOS.[71] After three years, PowerPoint sales were disappointing. Vol. 11, no. 1. Byrne, David (2003). "A Tool Only as Good as the User". Retrieved August 24, 2017. "Presenter View" (from 2003), widescreen slide formats. "The Man Who Invented PowerPoint". ISSN 0142-5471. p. A1. Less than a month after the software officially launched, ... "The Microsoft Office Bundles 4 Programs".
